

The Air Cleaning Professionals

Retrofit / Upgrade Packages

Refurbish Systems with Modern Filters, Blowers, Clamping Ductwork, Electrical Controls, Blower Silencers.

The real "green" alternative

Complete line of Variable Frequency Drives (VFD) fit new or existing equipment. Control packages are compatible with auto gates to sense airflow needs and control blowers to dramatically reduce energy needs. VFD's provide soft starting. Systems pay their way with power savings and energy credits.

Related System Components:

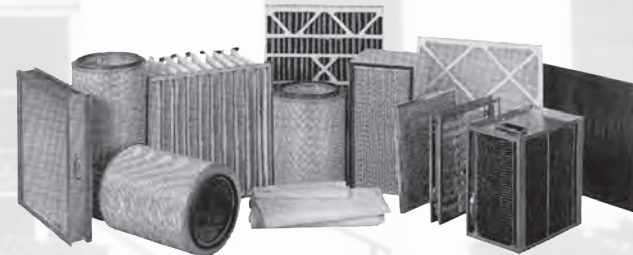

- Explosion Suppression
- Explosion Vents

- Spark Detection / Suppression Systems
- Abort Gates

Field Service, Replacement Filters / Parts:

- Field Service and parts available for most brands of equipment - all sizes.
- Factory Trained / Certified Service Technicians
- Bag House Filter / Cartridge Filter Dust Collector Change Outs / Black Light Tests
- Blower Repairs / Rotary Valve Repairs
- PM Plans / Annual Check-ups
- Poly Pads, Pleats, Micro Glass Bags, Cartridge Filters, Bag House Filters / Cages, Cyclone After Filters. Many Sizes In Stock.

Total Industrial & Commercial Clean Air Solutions

Our experience, combined with the industry's largest engineering, manufacturing & service capability assures that customer support needs are met!

Representing the most complete selection of quality products from Internationally respected companies.

Source Capture Fume Extractor Arms
Reach 3'-40', 5 different diameter sizes. Bench or wall mount, self supported, easy to position, stainless steel construction available.

Blowers / Fans-Ventilation Products
Backward inclined centrifugal, radial, airfoil, axial, material handling, man coolers, roof ventilators.

Clamping Ductwork, Fittings, Custom Hoods - In Stock
Galvanized or stainless steel. Pipe, Elbows, Branches, Manual/Auto Slide Gates.

Applications:
MFG. SHOPS / PLANTS
INDUSTRIAL PROCESSES, SCHOOLS,
LABS, MINES, FABRICATION, ABRASIVE BLASTING,
PHARMACEUTICAL, REPAIR/MAINTENANCE
FACILITIES, MATERIAL HANDLING,
HOUSEKEEPING

Cartridge Filter Dust Collectors
High efficiency / downflo designs, continuous / intermittent duty, the original ULTRA WEB NANOFIBER FILTERS.

Cyclone Type Dust Collectors & After Filters
7 sizes, optional hoppers, dumpsters 400-20,000 cfm, 2-50 Hp

Insertable / Bin Vent Dust Collectors
Use on Conveyor transfer points, bucket elevators, silos. Bag, Cartridge or PowerCore filter for all types of process dust.

IRD
An easy and economical solution for a wide range of dust collection applications. Open/ enclosed design, manual/auto shake filter cleaning, 5-25 hp sizes.

Reverse Pulse Bag House Dust Collectors
Round type combines cyclone pre-cleaning. Rectangular type features hopper inlet or downflo design.

PowerCore "Breakthrough Filter Technology"
Unique, patented filter pac design reduces dust collectors size and does the same job as larger systems. Clean side filter access, Bin Vent or central configurations save space and reduce cost.

Portable / Central Vacuum Units
Air or electric type. Complete with unit, piping and tools.
HEPA Vacs Available
Wet or dry type. Explosion Proof Available.

Downflo / Downflo Oval
Unit type or central dust collector. Original design cartridge filter unit captures smoke or dust. Continuous duty, over 40 standard sizes.

Downdraft Dust Collector
Work station unit available in 5 sizes for grinding, sanding, even welding.

Grinding / Sanding Booth / Welding Powder Coating / Dust Collection

Unimaster
Auto-Filter Shaker
Choice of drum sizes.

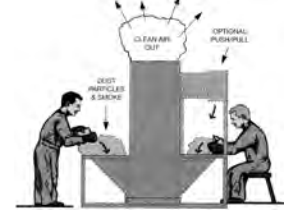

RF "Round Style" Bag House Dust Collectors
Handle heavy dust loads up to 100,000 cfm. Continuous duty, cyclone separation and bag filtration. DURA-LIFE FILTER.

Modular Bag House Dust Collector
Available in sizes from 2,000-100,000 cfm. Continuous duty. DURA-LIFE FILTER BAGS OR POWERCORE.

Wet Dust Collectors/ Grinding Stations / Booths
Use for sparks or explosive dusts. Individual units, work stations or central systems fit most applications.

Capture & Control Airborne Smoke, Dust, Mist, Odors & Fumes

Meet Emission Regulations, Protect Employees, Save Heat-AC, Recycle Air, Protect Machinery, Meet Insurance Standards
Product Recovery, Reduce Clean Up Costs
